Future Research Agenda My PhD r esearch is in the area of Behavior -

learning Agents in Artificial Intelligence and I am combining that with Human - Computer Interaction to model usable products that have far - reaching application. I have special interest in Data mining, Object - Oriented Modeling, and Modeling and Simulation of Dynamic Systems. I am also doing some work in ICT for Development with specific focus in areas of bridging the di g ital divide of ICT application and usage between the developed and developing populations. In this area I have special interest in producing affordable ICT products especially open - sou rce software platforms. I am partnering with research colleagues to explore other ICT application areas in governance and gender. We are exploring areas in which ICTs can be harnessed to improve governance and gender equity. Referees 1 - Dr. Edmund B. Ka titi (Ph.
